- Keep sending us great candidates;
- Your training services are really important;
- Learn even more about the workforce trends in our industries.

## **Final Observations**

Our interactive sessions were well received and we greatly Appreciate their time/insights. A few final comments...

- The employment environment in Arizona has improved in the last 3 years and most of the participants are optimistic that it will continue to improve in the future;
- ARIZONA@WORK is making a difference but must continue to develop consistent and compelling programs, influence the quality of our candidates and create long term partnerships with the companies;
- Our companies understand what the attributes are that will help an entry level candidate with career success—they just aren't seeing those attributes on a consistent basis;
- It's noisy out there in the market...ARIZONA@WORK will need to market and communicate its programs, its value and how to access its programs.
- Every state/region is in this game. Our promotion of Arizona as a great place to visit and live needs to include our promotion of a skilled workforce and a growing economy;
- Education needs to do more to align to the needs of the industries and to graduate more workforce ready students.
