

Drive the Future of Transportation Technology!

Buckle Up! Manpower is partnering with a leader in cutting-edge mobility and transportation technology to recruit **Teleoperations Specialists**. If you excel in fast-paced environments, stay steady under pressure, and enjoy navigating complex systems, this is your opportunity to make an impact every day.

What's the Job?

- Monitor and support real-time operations through secure remote systems
- Assist automated platforms during operational exceptions and complex scenarios
- Follow established safety and operational procedures in time-sensitive situations
- Document events, system activity, and outcomes

What's needed?

- Experience working in fast-paced, screen-based environments (such as technical monitoring, control centers, gaming, simulation, or multi-system platforms)
- Strong attention to detail and situational awareness
- Availability to work at least one weekend day per week
- Valid driver's license

What's in it for me?

- Engage in mission-critical operations supporting cutting-edge transportation technology
- Collaborate with a diverse and dynamic team
- Develop skills in high-reliability environments and technical monitoring
